

Project Nimbus Pilot Readiness Review

Agenda and pre-read | 17 September 2026 | 09:00-09:30 | Online meeting

Document status

This agenda records proposals and questions prepared before the meeting. It is not an approved decision record. Decisions, owners, dates, and approvals must be confirmed from the spoken meeting and documented with evidence.

Meeting purpose

Assess whether the Project Nimbus customer-service pilot is ready to proceed, agree the pilot scope and controls, assign readiness actions, and identify matters that require decisions outside the project team.

Expected outcomes

Outcome	Expected meeting result
Pilot scope	Confirm the participating team, approximate user group, duration, and target start date.
Data protection	Confirm permitted data and identify any required assessment or approval.
Procurement	Confirm quotation review actions and clarify whether the budget can be approved.
Readiness	Assign training, sandbox, support, and go/no-go preparation actions.
Open risks	Record unresolved SSO, budget, or ownership questions without inferring decisions.

Participants

Name	Role	Meeting responsibility
Elena Markovic	Project Manager	Chair; final reviewer
Liam Chen	Technical Lead	Technical readiness and SSO
Sofia Niemi	Data Protection Specialist	Data protection conditions
Arjun Patel	Project Coordinator	Coordination and record preparation
Mia Roberts	Procurement Specialist	Supplier quotation review

Detailed agenda

Proposed timings support facilitation only. Any proposal below remains unconfirmed until explicitly decided in the meeting.

Time	Topic	Pre-read context	Decision or output sought
09:00	1. Opening and attendance	Confirm participants and purpose.	Confirm meeting identity and attendance.
09:03	2. Pilot scope	Initial plan: customer-service pilot with a limited user group. Proposed launch: 15 October 2026.	Agree team, user count, duration, and start date.
09:08	3. Data protection	Clarify whether real customer records are required and whether a DPIA is needed.	Agree permitted data and assign any assessment.
09:13	4. Procurement and budget	Three supplier quotations expected. Draft budget ceiling: EUR 18,000, pending finance confirmation.	Assign quotation comparison. Confirm whether budget approval is possible.
09:18	5. Training and readiness	Training, sandbox testing, support material, and a go/no-go summary are required before launch.	Assign actions, owners, and dates where agreed.
09:24	6. Open technical risks	SSO approach requires architecture-board input.	Record any decision or leave the matter unresolved.
09:28	7. Recap and close	Review decisions, actions, unresolved matters, and conflicts.	Confirm the record for manager review.

Important pre-read qualifications

The 15 October launch date and EUR 18,000 ceiling are proposals, not approvals. The meeting record must distinguish planned agenda content from spoken decisions. The architecture board, finance function, and support team are not represented as meeting participants unless explicitly stated in the participant list.

Evidence expectation

The final record should allow reviewers to trace agenda-derived context to this document by page number and spoken decisions or actions to the meeting recording by timestamp.

Facilitator checklist and record template

Use this page to guide the discussion. Blank fields do not imply a decision, owner, or date.

Decision checklist

Question	Status before meeting	Evidence required in final record
What is the approved pilot scope?	Open	Spoken decision with timestamp
What is the approved pilot start date?	15 October proposed only	Spoken decision; record conflict if changed
What data may be used?	Open	Spoken decision with timestamp
Is the budget approved?	Finance confirmation pending	Do not claim approval without explicit statement
Which SSO approach is selected?	Architecture-board input pending	Leave unresolved unless explicitly decided

Action-item capture guidance

For each action, capture the task, owner, due date, uncertainty reason, and evidence. If an owner or date is not explicitly agreed, leave it null and explain the uncertainty. Do not assign an action to the person who merely raised the topic.

Action	Owner	Due date	Uncertainty	Evidence

Review and approval

The generated record remains pending review until the project manager approves it. If returned, the coordinator may correct the record or upload corrected source material before processing and review repeat.
